

How to Use TIF to Improve Your Downtown

Tax Increment Financing (TIF)

directs tax revenues generated within a TIF district for investment in the district

the first step to improving your downtown is to **gather local stakeholders** to develop the downtown vision

then determine the boundaries of the TIF district

hold at least one **public hearing** on the plan

submit the plan to the **planning commission** for an advisory opinion

next, create a master plan for the district

the municipality then determines if the TIF district & plan will **contribute to their economic growth** or improve residents' health, welfare or safety

the municipality can now **construct, improve and rehabilitate property;** issue bonds and obligations, accept grants, loans & provide services in the district

the increased tax revenue is used to **repay bonds, provide incentives, and for public improvements**
